

## NATURAL FYAH

A fiery young Queen is making vibrational ripples in an industry that, at many of times, requires specific packaging for its products and a certain look for its vessels. Vocalist Natural Fyah, while initially starting out feeling boxed in this way, has evolved, into something even more beautiful than originally anticipated. Starting out as a figurative “caterpillar”, she began her musical endeavours as a mere spectator, listening to, singing with, & collecting what music she could by recording it over her mother’s Luther Vandross tapes.. As time progressed, the caterpillar grew, and so did its musical tastes, it’s character, it’s perception, it’s spiritual journey.

Progressing into a cocoon to learn, develop, and transform, we now have a being who has gone through a journey of changes, understanding, patience and growth...the caterpillar once connected to a safety net is now set free, making music that feeds the soul and evokes emotion. The caterpillar is now a butterfly and this butterfly will flutter to the beat of her own heart, now understanding that the journey has really just begun. The journey is spiritual, musical, and sweet with the honey of her past, present and future. Natural Fyah is ready...are you?
